

Powder-to-Clay Foaming Mask

Formulation

This mask comes in a concentrated powder form that transforms into a clay paste, then a gentle foam for easy rinse-off. Featured anhydrous products include Suga®Nate 160 Dry MB and Cola®Mate LA-100 MB for mild cleansing, as well as Colonial BetaNat for moisturization. Use: Simply mix with water to create a smooth paste, apply to face, and allow to dry. When ready to remove, add warm water and work into a lather, then rinse clean. Check out the video of the Christine and Molly discussing this formulation!

PHASE A

PHASE TOTAL: 100.0000%

PHASE INSTRUCTIONS

No phase instructions provided.
